How 1% works

Paid, logged-in print earns 1 point per print dollar. 1 point = \$0.01. A \$100 print line becomes \$1.00 credit. Guest checkout and unpaid Pay Later jobs do not create a ledger row.

When you can redeem

Redeem starts at \$25.00, which is 2,500 points. That is 1% of \$2,500 in paid print. The coupon is a customer-only CR- code. It is not cash and it is not transferable. One account already holds \$35.49. Nobody has redeemed yet.

Example credit from live shop print cells (Sept 15, 2026)

Job	Print line	1% credit
250 economical cards, 14 pt. Gloss both sides	\$19.44	\$0.19
1,000 of the same spec	\$33.73	\$0.34
5,000 regular cell	\$75.90	\$0.76
5,000 with 5kcards-for-49	\$49.00	\$0.49
Paid print needed to redeem \$25	\$2,500.00	\$25.00
A product coupon that lowers the print line also lowers the credit. Shipping, tax, and design fees do not earn. Check your balance at 55printing.com/my-account/rewards after you sign in.		

Check your own number. Do not guess from this sheet.

This page is the shop-wide snapshot. \$63,946.24 is \$4.95 times 12,861 order accounts plus \$284.29 already earned. Your account only shows your row.
